Product Data Sheet

PE anti-mouse CD2

Catalog # / Size:	1100535 / 50 μg 1100540 / 200 μg	10 ⁰ 10 ¹ 10 ² Log Fluoresence C57BL/6 mouse sple with RM2-5 PE
Clone:	RM2-5	
Isotype:	Rat IgG2b, λ	
Immunogen:	BALB/c mouse thymocytes	
Reactivity:	Mouse	
Preparation:	The antibody was purified by affinity chromatography, and conjugated with PE under optimal conditions. The solution is free of unconjugated PE and unconjugated antibody.	
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.	
Concentration:	0.2	

Applications:

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 0.25 microg per 10 ⁶ cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.
Application Notes:	Additional reported applications (for the relevant formats) include: <i>in vitro</i> blocking of CD2-mediated cell-cell adhesion and inhibition of T cell activation1, blocking of T cell A.I.C.D.2, immunoprecipitation3, and co-induction of thymocyte maturation4. The RM2-5 antibody can block CD2-mediated cell-cell adhesion. The LEAF [™] purified antibody (Endotoxin <0.1 EU/µg, Azide-Free, 0.2 µm filtered) is recommended for functional assays (Cat. No. 100110).

Description:	CD2 is a 45-58 kD type I transmembrane glycoprotein, also known as LFA-2, T11 or Ly-37. It is a member of the Ig superfamily. Mouse CD2 is primarily expressed on T cells, B cells, thymocytes and NK cells. It is a ligand for CD48 and is involved in T cell activation and differentiation.
