## **Product Data Sheet**

## PerCP/Cy5.5 anti-mouse CD24

Catalog # / Size:	1109115 / 25 μg 1109120 / 100 μg
Clone:	M1/69
Isotype:	Rat IgG2b, к
Immunogen:	C57BL/10 mouse splenic T cells and concanavalin A-activated splenocytes
<b>Reactivity:</b>	Mouse
Preparation:	The antibody was purified by affinity chromatography, and conjugated with PerCP/Cy5.5 under optimal conditions. The solution is free of unconjugated PerCP/Cy5.5 and unconjugated antibody.
Preparation: Formulation:	chromatography, and conjugated with PerCP/Cy5.5 under optimal conditions. The solution is free of unconjugated PerCP/Cy5.5 and unconjugated

C57 splenocytes stained with M1/69 PerCP/Cy5.5

## **Applications:**

**Applications:** Flow Cytometry

**Recommended** Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is  $\leq 0.25$  microg per  $10^6$  cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.

 $\ast$  PerCP/Cy5.5 has a maximum absorption of 482 nm and a maximun emission of 690 nm.

**Application Notes:** Additional reported applications (for the relevant formats) include: Western blotting1, *in vitro* induction of thymocyte maturation2, complement-mediated cytotoxicity3, and immunohistochemistry of acetone-fixed frozen sections4, formalin-fixed paraffin-embedded sections5 and zinc-fixed paraffin-embedded sections<sup>10</sup>. The LEAF<sup>™</sup> purified antibody (Endotoxin <0.1 EU/µg, Azide-Free, 0.2 µm filtered) is recommended for functional assays (Cat. No. 101810).

**Description:** CD24 is a 35-45 kD protein also known as Heat Stable Antigen (HSA), Ly-52, or Nectadrin. It is a GPI-linked sialoglycoprotein expressed on lymphocytes,

For research use only. Not for diagnostic use. Not for resale. Sony Biotechnology Inc. 1730 North First Street, San Jose, CA 95112 www.sonybiotechnology.com granulocytes, epithelial cells, thymocytes, monocytes, erythrocytes, and dendritic cells. CD24 expression varies during T and B cell differentiation and is a useful marker for delineating various lymphocyte developmental stages. CD24 serves as an adhesion or costimulatory molecule involved in T and B lymphocyte activation and differentiation by homophilic binding or binding to CD62P.
