## **Product Data Sheet**

## APC/Fire™ 750 anti-mouse CD25

 $\textbf{Catalog \# /} \quad 1109605 \, / \, 25 \, \mu g$ 

**Size:**  $1109610 / 100 \mu g$ 

Clone: 3C7

**Isotype:** Rat IgG2b, κ

Immunogen: IL-2-dependent BALB/c mouse helper

T-cell clone HT-2

Reactivity: Mouse

**Preparation:** The antibody was purified by affinity

chromatography and conjugated with

APC/Fire™ 750 under optimal

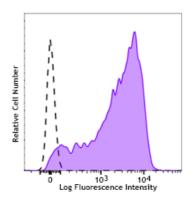

conditions.

**Formulation:** Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide.

Workshop Number: 750 under optimal conditions.

Concentration: 0.2 mg/ml

ConA/IL-2 stimulated (3 days) C57BL/6 splenocytes were stained with CD25 (clone 3C7) APC/Fire™ 750 (filled histogram) or rat IgG2b, κ APC/Fire™ 750 isotype control (open histogram).

CD4 PE

k isotype

## **Applications:**

Applications: Flow Cytometry

Recommended

**Usage:** 

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤1.0 µg per million cells in 100 µl volume. It is recommended that the reagent be titrated for optimal performance for each

application.

\* APC/Fire  $^{\mathsf{m}}$  750 has a maximum excitation of 650 nm and a maximum

emission of 787 nm.

Application Notes:

Additional reported applications (for the relevant formats) include: *in vitro* blocking of IL-2 binding to low- and high-affinity receptors <sup>1,2</sup>, and immunohistochemical staining of acetone-fixed frozen sections. 3C7 antibody recognizes different epitope of PC61 antibody (Cat. No. 102002). The Ultra-LEAF™ Purified antibody (Endotoxin < 0.01 EU/µg, Azide-Free, 0.2 µm filtered) is recommended for

functional assays (Cat. No. 101925 and

101926).

**Description:** CD25 is a 55 kD glycoprotein, also known as the low affinity IL-2R $\alpha$ , Ly-43,

p55, or Tac. It is expressed on activated T and B cells, thymocyte subset, pre-B cells, and T regulatory cells. In association with CD122 (IL-2R $\beta$ ) and CD132(common  $\gamma$  chain), CD25 forms the high affinity signaling IL-2

receptor.
