Product Data Sheet

APC anti-mouse CD36

Catalog # / Size: 1113055 / 25 µg

1113060 / 100 µg

Clone:

Isotype: Hamster IgG

Full length version of the protein Immunogen:

Reactivity: Mouse

Preparation: The antibody was purified by affinity

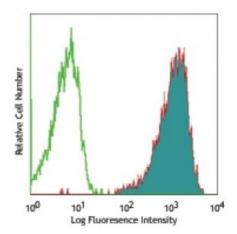

chromatography, and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and

unconjugated antibody.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide.

Concentration: 0.2

Thioglycollate-elicited BALB/c mouse peritoneal macrophages stained with HM36 APC

Applications:

Applications: Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of

this reagent is ≤ 0.25 microg per 106 cells in 100 microL volume. It is

recommended that the reagent be titrated for optimal performance for each

application.

Application

Description:

CD36 is a 85 kD glycoprotein, also known as FAT, gplllb, or gplV. It is a member of the class B scavenger receptor family, expressed on platelets, monocytes, macrophages, megakaryocytes, microvasculature, dendritic cells and mammary endothelial cells. The primary ligands for CD36 have been reported to be oxidized low density lipoprotein, anionic phospholipids, and collagens I, IV, and V. CD36 acts as a scavenger receptor thus promoting the removal of apoptotic neutrophils and other apoptotic bodies, as well as clearance of defective erythrocytes.
