Product Data Sheet

APC anti-mouse CD36

Catalog # / Size:	1113060 / 100 μg 1113055 / 25 μg	
Clone:	НМ36	Relative Cell Number
Isotype:	Hamster IgG	
Immunogen:	Full length version of the protein	
Reactivity:	Mouse	
Preparation:	The antibody was purified by affinity chromatography, and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.	
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.	L Thioglycoll
Concentration:	0.2	mouse per stained wit

Thioglycollate-elicited BALB/c mouse peritoneal macrophages stained with HM36 APC

Applications:

Applications:Flow CytometryRecommended
Usage:Each lot of this antibody is quality control tested by immunofluorescent staining
with flow cytometric analysis. For flow cytometric staining, the suggested use of
this reagent is ≤ 0.25 microg per 106 cells in 100 microL volume. It is
recommended that the reagent be titrated for optimal performance for each
application.

Description: CD36 is a 85 kD glycoprotein, also known as FAT, gpIIIb, or gpIV. It is a member of the class B scavenger receptor family, expressed on platelets, monocytes, macrophages, megakaryocytes, microvasculature, dendritic cells and mammary endothelial cells. The primary ligands for CD36 have been reported to be oxidized low density lipoprotein, anionic phospholipids, and collagens I, IV, and V. CD36 acts as a scavenger receptor thus promoting the removal of apoptotic neutrophils and other apoptotic bodies, as well as clearance of defective erythrocytes.
