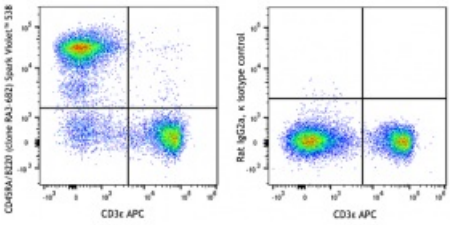
Product Data Sheet

Spark Violet™ 538 anti-mouse/human CD45R/B220

Catalog # / Size:	1116420 / 100 µg 1116415 / 25 µg
Clone:	RA3-6B2
Isotype:	Rat IgG2a, κ
Immunogen:	Abelson murine leukemia virus-induced pre-B tumor cells
Reactivity:	Human, Mouse, Other
Preparation:	The antibody was purified by affinity chromatography and conjugated with Spark Violet™ 538 under optimal conditions.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide
Workshop Number:	750 under optimal conditions.
Concentration:	0.5 mg/mL



C57BL/6 mouse splenocytes stained with CD3ε APC and CD45R/B220 (clone RA3-6B2) Spark Violet™ 538 (left) or rat IgG2a, k Spark Violet™ 538 isotype control (right).

Applications:

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 1.0 µg per million cells in 100 µL volume. It is recommended that the reagent be titrated for optimal performance for each application. * Spark Violet™ 538 has a maximum excitation of 396 nm and a maximum emission of 538 nm.
Application Notes:	Clone RA3-6B2 has been described to react with an epitope on the extracellular domain of the transmembrane CD45 glycoprotein which is dependent upon the expression of exon A and specific carbohydrate residues. Additional reported applications (for the relevant formats) include: immunoprecipitation[1], *in vitro* and *in vivo* modulation of B cell responses[2-4], and immunohistochemistry of acetone-fixed frozen sections and formalin-fixed paraffin-embedded sections[5,6].

Description: CD45R, also known as B220, is an isoform of CD45. It is a member of the protein tyrosine phosphatase (PTP) family with a molecular weight of approximately 180-240 kD. CD45R is expressed on B cells (at all developmental stages from pro-B cells through mature B cells), activated B cells, and subsets of T and NK cells. CD45R (B220) is also expressed on a subset of abnormal T cells involved in the pathogenesis of systemic autoimmunity in MRL-*Fas*^{lpr} and MRL-*Fas*^{gld} mice. It plays a critical role in TCR and BCR signaling. The primary ligands for CD45 are galectin-1, CD2, CD3, and CD4. CD45R is commonly used as a pan-B cell marker; however, CD19 may be more appropriate for B cell specificity.
