## PerCP/Cy5.5 anti-mouse CD45RB

Catalog # / Size: 1116565 / 25 µg

1116570 / 100 µg

Clone: C363-16A

Rat IgG2a, ĸ Cloned mouse Th2 cell lines Immunogen:

Reactivity: Mouse

Isotype:

**Preparation:** The antibody was purified by affinity

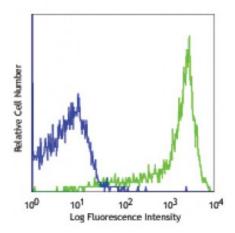

chromatography, and conjugated with PerCP/Cy5.5 under optimal conditions. The solution is free of unconjugated PerCP/Cy5.5 and unconjugated

antibody.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide.

Concentration: 0.2

C57BL/6 mouse splenocytes stained with C363-16A PerCP/Cy5.5

## **Applications:**

**Applications:** Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of

this reagent is  $\leq 0.25$  microg per 106 cells in 100 microL volume. It is

recommended that the reagent be titrated for optimal performance for each

application.

\* PerCP/Cy5.5 has a maximum absorption of 482 nm and a maximum emission of

690 nm.

CD45RB is an isoform of CD45 with exon 5 splicing (encodes B determinant). It is **Description:** 

a 220 kD glycoprotein expressed on peripheral B cells, naïve T cells, thymocytes, weakly on macrophages, and dendritic cells. It plays a critical role in TCR and BCR signaling. As T cells become activated and progress from naïve to memory cells, CD45RB expression is downregulated. Additionally, functionally distinct CD4<sup>+</sup> T cell subsets, which secrete differing cytokine profiles, can be separated by CD45RB intensity. The primary ligands for CD45 are galectin-1, CD2, CD3, CD4

and Thy-1.
