## **Biotin anti-mouse CD48**

**Catalog # / Size:** 1117045 / 50 μg

1117050 / 500 μg

Clone: HM48-1

**Isotype:** Hamster IgG

Immunogen: Mouse T lymphoma MBL-2

Reactivity: Mouse

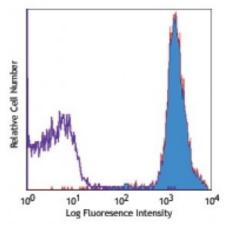

Preparation: The antibody was purified by affinity

chromatography, and conjugated with biotin under optimal conditions. The solution is free of unconjugated biotin.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide.

Concentration: 0.5

C57BL/6 mouse splenocytes stained with biotinylated HM48-1, followed by Sav-PE

## **Applications:**

**Applications:** Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of

this reagent is  $\leq 0.25$  microg per  $10^6$  cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each

application.

Application Notes:

The HM48-1 antibody is useful for blocking *in vitro* and *in vivo* CD48 mediated interactions. Additional reported applications (for the relevant formats) include: immunoprecipitation1, costimulation of T cell proliferation<sup>1,2</sup>, blocking of CD48-CD2 interaction1, and inhibition of CTL activity and graft rejection<sup>1,2</sup>. The LEAF purified antibody (Endotoxin <0.1 EU/ $\mu$ g, Azide-Free, 0.2  $\mu$ m filtered) is recommended for functional assays (Cat. No. 103408). For *in vivo* studies or highly sensitive assays, we recommend Ultra-LEAF purified antibody (Cat. No. 103430) with a lower endotoxin limit than standard LEAF purified antibodies (Endotoxin <0.01 EU/microg).

**Description:** 

CD48 is a 45 kD GPI-anchored glycoprotein also known as BCM1, Blast-1 (human), and OX-45 (rat). It is a member of the lg superfamily, expressed on T and B cells and monocytes/macrophages. It plays a role in adhesion and T cell recognition. The primary ligands for CD48 are CD2 and CD244.
