Product Data Sheet

APC/Cy7 anti-mouse CD48

Catalog # / Size: 1117155 / 25 μg

1117160 / 100 µg

Clone: HM48-1

Isotype: Hamster IgG

Immunogen: Mouse T lymphoma MBL-2

Reactivity: Mouse

Preparation: The antibody was purified by affinity

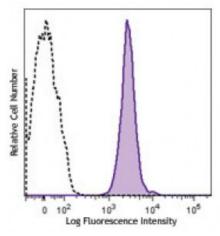

chromatography and conjugated with APC/Cy7 under optimal conditions. The solution is free of unconjugated APC/Cy7

and unconjugated antibody.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide.

Concentration: NULL

C57BL/6 mouse splenocytes were stained with CD48 (clone HM48-1) APC/Cy7 (filled histogram) or Armenian hamster IgG APC/Cy7 isotype control (open histogram).

Applications:

Applications: Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤0.25 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each

application.

Application

Notes:

The HM48-1 antibody is useful for blocking *in vitro* and *in vivo* CD48 mediated interactions. Additional reported applications (for the relevant formats) include: immunoprecipitation1, costimulation of T cell proliferation 1,2 , blocking of CD48-CD2 interaction1, and inhibition of CTL activity and graft rejection 1,2 . The LEAF $^{\text{TM}}$ purified antibody (Endotoxin <0.1 EU/µg, Azide-Free, 0.2 µm filtered) is recommended for functional assays (Cat. No. 103408). For *in vivo* studies or highly sensitive assays, we recommend Ultra-LEAF $^{\text{TM}}$ purified antibody (Cat. No. 103430) with a lower endotoxin limit than standard LEAF $^{\text{TM}}$ purified antibodies (Endotoxin <0.01 EU/microg).

Application 1. Ka

Kato K, et al. 1992. J. Exp. Med. 176:1241. (IP, Costim, Block)

Description:

References:

CD48 is a 45 kD GPI-anchored glycoprotein also known as BCM1, Blast-1 (human), and OX-45 (rat). It is a member of the lg superfamily, expressed on T and B cells and monocytes/macrophages. It plays a role in adhesion and T cell recognition. The primary ligands for CD48 are CD2 and CD244.
