

**APC anti-mouse H-2Kb/H-2Db**

**Catalog # / Size:** 1173070 / 100 µg  
1173065 / 25 µg

**Clone:** 28-8-6

**Isotype:** Mouse IgG2a, κ

**Immunogen:** C3H.SW mouse splenocytes

**Reactivity:** Mouse, Other

**Preparation:** The antibody was purified by affinity chromatography and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.

**Formulation:** Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.

**Concentration:** 0.2 mg/ml

C57BL/6 mouse splenocytes were stained with H-2K<sup>b</sup>/H-2D<sup>b</sup> (clone 28-8-6) APC (filled histogram) or Mouse IgG2a, κ APC isotype control (open histogram).

**Applications:**

**Applications:** Flow Cytometry

**Recommended Usage:** Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤0.5 µg per million cells in 100 µl volume. It is recommended that the reagent be titrated for optimal performance for each application.

**Application Notes:** Additional reported applications (for the relevant formats) include: complement-mediated cytotoxicity<sup>1</sup>, and immunohistochemical staining<sup>2</sup> of acetone-fixed frozen sections.

**Description:** The 28-8-6 antibody reacts with the H-2K<sup>b</sup> and H-2D<sup>b</sup> MHC class I alloantigens expressed on nucleated cells from mice of the H-2K<sup>b</sup>/H-2D<sup>b</sup> haplotype. H-2K<sup>b</sup>/H-2D<sup>b</sup> is involved in antigen presentation to T cells expressing CD3/TCR and CD8 proteins. The 28-8-6 antibody cross-reacts with H-2D<sup>d</sup> MHC class I alloantigen, but does not react with alloantigens of f, k, p, q, r, s haplotypes.
