## PE/Cy7 anti-mouse H-2Kb/H-2Db

Catalog # / Size:	1173075 / 25 μg 1173080 / 100 μg
Clone:	28-8-6
Isotype:	Mouse IgG2a, к
Immunogen:	C3H.SW mouse splenocytes
<b>Reactivity:</b>	Mouse, Other
Preparation:	The antibody was purified by affinity chromatography and conjugated with PE/Cy7 under optimal conditions. The solution is free of unconjugated PE/Cy7 and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
Concentration:	0.2 mg/ml

C57BL/6 mouse splenocytes were stained with H-2K<sup>b</sup>/H-2D<sup>b</sup> (clone 28-8-6) PE/Cy7 (filled histogram) or mouse IgG2a,  $\kappa$  PE/Cy7 isotype control (dashed histogram).

## **Applications:**

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is $\leq 0.5 \ \mu$ g per million cells in 100 $\mu$ l volume. It is recommended that the reagent be titrated for optimal performance for each application.
Application Notes:	Additional reported applications (for the relevant formats) include: complement-mediated cytotoxicity <sup>1</sup> , and immunohistochemical staining <sup>2</sup> of acetone-fixed frozen sections.

Description:	The 28-8-6 antibody reacts with the H-2K <sup>b</sup> and H-2D <sup>b</sup> MHC class I alloantigens expressed on nucleated cells from mice of the H-2K <sup>b</sup> /H-2D <sup>b</sup> haplotype. H- 2K <sup>b</sup> /H-2D <sup>b</sup> is involved in antigen presentation to T cells expressing CD3/TCR and CD8 proteins. The 28-8-6 antibody cross-reacts with H-2D <sup>d</sup> MHC class I

alloantigen, but does not react with alloantigens of f, k, p, q, r, s haplotypes.
