## Alexa Fluor® 700 anti-mouse CD19

**Catalog # / Size:** 1177640 / 100 μg

1177635 / 25 μg

Clone: 6D5

Isotype: Rat IgG2a, κ

Immunogen: Mouse CD19-expressing K562 human

erythroleukemia cells

Reactivity: Mouse

**Preparation:** The antibody was purified by affinity

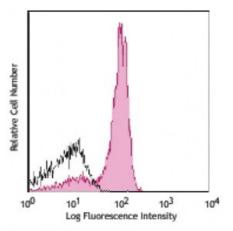

chromatography, and conjugated with Alexa Fluor® 700 under optimal

conditions.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide.

Concentration: 0.5

C57BL/6 mouse splenocytes were stained with CD19 (clone 6D5) Alexa Fluor® 700 (filled histogram) or rat IgG2a, κ Alexa Fluor® 700 isotype control (open histogram).

## **Applications:**

**Applications:** Flow Cytometry

Recommended

**Usage:** 

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. The suggested use of this reagent is  $\leq 0.25$  microg per million cells in 100 microL volume. It is highly recommended that the reagent be titrated for optimal performance for each application.

\* Alexa Fluor® 700 has a maximum emission of 719 nm when it is excited at 633 nm / 635 nm. Prior to using Alexa Fluor® 700 conjugate for flow cytometric analysis, please verify your flow cytometer's capability of exciting and detecting

the fluorochrome.

Application Notes:

Additional reported applications (for the relevant formats) include:

immunofluorescence<sup>7</sup>.

**Description:** CD19 is a 95 kD glycoprotein also known as B4. It is a member of the Ig

superfamily, expressed on all pro-B to mature B cells (during development) and follicular dendritic cells. Plasma cells do not express CD19. CD19, in association with CD21 and CD81, forms a molecular complex integral to B cell activation.
