PerCP/Cy5.5 anti-human/mouse integrin β7

Catalog # / Size: 1205035 / 25 μg

1205040 / 100 µg

Clone: FIB27

Isotype: Rat IgG2a, κ

Immunogen: TK1 cells

Reactivity: Human, Mouse

Preparation: The antibody was purified by affinity

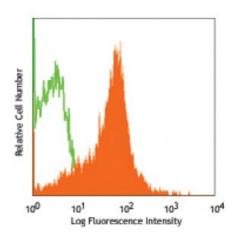

chromatography, and conjugated with PerCP/Cy5.5 under optimal conditions. The solution is free of unconjugated PerCP/Cy5.5 and unconjugated

antibody.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide.

Concentration: 0.2

C57BL/6 splenocytes stained with

FIB27 PerCP/Cv5.5

Applications:

Applications: Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is \leq 0.25 microg per million cells in 100 microL volume. It is

this reagent is ≤0.25 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each

application.

* PerCP/Cy5.5 has a maximum absorption of 482 nm and a maximum emission of

690 nm.

Description:

Integrin β 7 is a 130 kD glycoprotein, also known as integin β p. It is a member of the Ig superfamily. In association with integrin α 4 or α E chain, β 7 forms α 4/ β 7 or

 α E/ β 7 heterodimer. α 4/ β 7 (CD49d/ β 7, LPAM-1) is expressed on majority of peripheral lymphocytes, small subsets of thymocytes and bone marrow

progenitors. LPAM-1 binds to several ligands, VCAM-1, MAdCAM-1 and fibronectin, and is involved in lymphocyte adhesion, some hematopoietic progenitor cells migration. $\alpha E/\beta 7$ (CD103/ $\beta 7$, $\alpha_{IEL}/\beta 7$) is expressed on intestinal intraepithelial lymphocytes (IEL), dendritic epidermal T cells, T regulatory cells, a subset of CD8+ T cells in lymph nodes and lamina propria. CD103/ $\beta 7$ complex is thought to play a role in lymphocyte retention via interaction with its lignd E-Cadherin. The FIB27 antibody has been reported to react with mouse and human $\beta 7$ integrin and

to block β7 integrin-mediated cell adhesion in *in vitro* and *in vivo* studies.
