Product Data Sheet

APC anti-mouse CD103

Catalog # / Size: $1207065 / 25 \mu g$

 $1207070 / 100 \mu g$

Clone: 2E7

Isotype: Hamster IgG

Immunogen: Mouse intestinal intraepithelial

lymphocytes

Reactivity: Mouse

Preparation: The antibody was purified by affinity

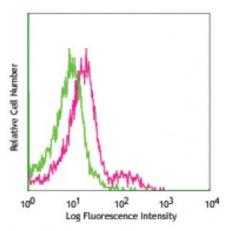

chromatography, and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and

unconjugated antibody.

Formulation: Phosphate buffered solution, pH 7.2,

containing 0.09% sodium azide.

Concentration: 0.2

BALB/c splenocytes stained with

2E7 APC

Applications:

Applications: Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of

this reagent is \leq 0.25 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each

application.

Application

Additional reported applications (for the relevant formats) include:

Notes:

immunoprecipitation1, immunohistochemical staining^{1,7} of acetone-fixed frozen

sections, immunofluorescence2, and *in vitro* activation1.

Description:

CD103 is a type I transmembrane glycoprotein known as αE integrin or Integrin α_{IEL} chain. It belongs to the integrin family and is primarily found on intestinal intraepithelial lymphocytes (IEL). CD103 is also expressed on a subpopulation of lamina propria T cells, epithelial dendritic cells, lamina propria-derived dendritic cells, and a small subset of peripheral lymphocytes. T regulatory cells express high level of CD103. The CD103 expression on lymphocytes can be induced upon activation and TGF- β stimulation. In association with integrin β_7 , CD103 is expressed as $\alpha E/\beta_7$ heterodimer. Mature CD103 protein can be cleaved into 2 chains, a 150 kD (C-terminal) chain and a 25 kD (N-terminal) chain, which remain linked by disulfide bonds. CD103 binds to E-cadherin and mediates homing of lymphocytes to the intestinal epithelium.
