## Product Data Sheet

## PE/Cy7 anti-mouse CD14

| Catalog \# / Size: | $1216575 / 25 \mu \mathrm{~g}$ |
| ---: | :--- |
|  | $1216580 / 100 \mu \mathrm{~g}$ |
| Clone: | Sal4-2 |
| Isotype: | Rat IgG2a, k |
| Immunogen: | Mouse thymus or spleen |
| Reactivity: | Mouse |
| Preparation: | The antibody was purified by affinity <br> chromatography, and conjugated with <br> PE/Cy7 under optimal conditions. The <br> solution is free of unconjugated PE/Cy7 <br> and unconjugated antibody. <br> Formulation: |
| Phosphate-buffered solution, pH 7.2, <br> containing 0.09\% sodium azide. |  |
| Concentration: | 0.2 |

Thioglycolate-elicited Balb/c mouse peritoneal macrophages stained with Sa14-2 PE/Cy7

## Applications:

## Applications: Flow Cytometry

## Recommended <br> Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is $\leq 1.0$ microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.

Application 1. Wallner S, et al. 2013. PLoS One. 8:65178. PubMed References:

Description: CD14 is a 53-55 kD glycosylphosphatidylinositol (GPI)-linked membrane glycoprotein also known as LPS receptor. CD14 is expressed on macrophages, dendritic cells, Kupffer cells, hepatocytes, and granulocytes. As a high-affinity receptor for LPS-LBP (LPS-binding protein) complex, CD14, in association with Toll-like Receptor 4 (TLR4) or 2 (TLR2), is involved in the clearance of gramnegative pathogens.
