

FITC anti-mouse TCR Vα2

Catalog # / Size: 1239030 / 250 µg
1239025 / 50 µg

Clone: B20.1

Isotype: Rat IgG2a, λ

Immunogen: Soluble TCR from mouse CTL clone KB5-C20

Reactivity: Mouse

Preparation: The antibody was purified by affinity chromatography, and conjugated with FITC under optimal conditions. The solution is free of unconjugated FITC.

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.

Concentration: 0.5

C57BL/6 mouse splenocytes stained with CD3 (145-2C11) PE and B20.1 FITC

Applications:

Applications: Flow Cytometry

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤0.25 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.

Application Notes: The B20.1 antibody recognizes most members of the Vα2 TCR subfamily in mice having the a, b, and c haplotypes.

Description: The TCR α (α) chain complexes with the TCR β (β) chain to form the T cell receptor in 95% of T cells, whereas the remaining 5% of T cells express gamma and delta chains (γδ). TCR Vα2 is a distinct TCR subfamily found in mice having the a, b, and c haplotypes.
