

APC/Cy7 anti-mouse Ly-6C

Catalog # / Size:	1240130 / 100 µg 1240125 / 25 µg
Clone:	HK1.4
Isotype:	Rat IgG2c, κ
Immunogen:	L3 cloned CTL cells
Reactivity:	Mouse
Preparation:	The antibody was purified by affinity chromatography and conjugated with APC/Cy7 under optimal conditions. The solution is free of unconjugated APC/Cy7 and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
Concentration:	0.2

C57BL/6 bone marrow cells stained with HK1.4 APC/Cy7

Applications:

Applications: Flow Cytometry

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤0.25 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.

Application Notes: Clone HK1.4 does not block the binding of clone RB6-8C5⁸.

Additional reported applications (for relevant formats of this clone) include: *in vitro* activation of T cells¹⁻³ and immunohistochemistry of frozen sections⁴.

Description: Most hematopoietic cells express one or more members of Ly-6 family. The expression of Ly-6 varies with development stage and activation. Ly-6C is a 14-17 kD GPI-linked surface protein expressed on mouse monocyte/macrophage cells, endothelial cells, neutrophils, and some T cell subsets. Ly-6C is reported to be an indicator of memory CD8⁺ T cells.
