

**APC anti-mouse CD98 (4F2)**

**Catalog # /** 1241060 / 100 µg

**Size:** 1241055 / 25 µg

**Clone:** RL388

**Isotype:** Rat IgG2a, κ

**Immunogen:** Subline of mouse T lymphoma EL4

**Reactivity:** Mouse

**Preparation:** The antibody was purified by affinity chromatography and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.

**Formulation:** Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.

**Concentration:** 0.2 mg/ml

C57BL/6 splenocytes stained with CD98 (clone: RL388) APC (filled histogram) or rat IgG2a, κ APC isotype control (open histogram).

**Applications:**

**Applications:** Flow Cytometry

**Recommended Usage:** Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 0.5 µg per million cells in 100 µl volume. It is recommended that the reagent be titrated for optimal performance for each application.

**Description:** CD98 is a cell surface glycoprotein of 125 kd consisting of an 85 kd heavy chain and a 40 kd light chain. It is expressed on T, B, NK cells, granulocytes and many cell lines and tumor cells. CD98 has been shown to be involved in sodium-dependent calcium flux in muscle cells and lymphocyte activation.
