## Product Data Sheet

## PerCP/Cy5.5 anti-mouse CD34

Catalog \# / Size: $1243035 / 25 \mu \mathrm{~g}$ $1243040 / 100 \mu \mathrm{~g}$<br>Clone: HM34<br>Isotype: Hamster IgG<br>Immunogen: Mouse CD34 transfected BHK cells<br>Reactivity: Mouse<br>Preparation: The antibody was purified by affinity chromatography, and conjugated with PerCP/Cy5.5 under optimal conditions. The solution is free of unconjugated PerCP/Cy5.5 and unconjugated antibody.<br>Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09\% sodium azide.

Bend. 3 mouse endothelial cells stained with HM34 PerCP/Cy5.5

## Concentration: 0.2

## Applications:

Applications: Flow Cytometry
Recommended Each lot of this antibody is quality control tested by immunofluorescent staining Usage: with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is $\leq 1.0$ microg per 106 cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.

* PerCP/Cy5.5 has a maximum absorption of 482 nm and 564 nm and a maximun emission of 690 nm .

Application
Notes:
The HM34 antibody does not stain bone marrow cells like some other mouse CD34 antibodies, probably because the antibody recognizes a different epitope from other mAbs.

Description: CD34 is a highly glycosylated hematopoietic progenitor antigen. Two isoforms of CD34 have been reported. CD34 is expressed on hematopoietic progenitors, as well as endothelial cells, brain and testis. CD34 is thought to function as an adhesion molecule for attachment of stem cells to extracellular matrix or stromal cells.
