

Pacific Blue™ anti-mouse Lineage Cocktail

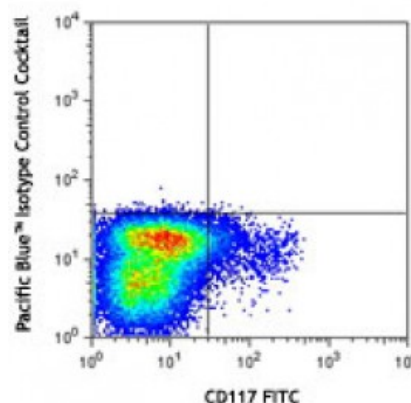

Catalog # / Size: 1266550 / 100 tests
Clone: 17A2/RB6-8C5/RA3-6B2/Ter-119/M1/70
Isotype: Rat IgG2a,Rat IgG2b
Reactivity: Mouse
Preparation: The antibodies are purified by affinity chromatography, and conjugated with Pacific Blue™ under optimal conditions. The solution is free of unconjugated Pacific Blue™.
Formulation: This set contains Pacific Blue™ conjugated antibodies in an optimal concentration for flow cytometric analysis.
Concentration: Lot-specific

C57BL/6 bone marrow cells were stained with CD117 FITC and Pacific Blue™ lineage cocktail (top plot) or Pacific Blue™ isotype control cocktail (bottom plot).

Applications:

Applications: Flow Cytometry
Recommended Usage: Each lot of these antibodies is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 20 microL per million cells or 20 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

Description: The mouse lineage panel has been designed to react with cells from the major hematopoietic cell lineages, such as T lymphocytes, B lymphocytes, monocytes/macrophages, granulocytes, NK cells, and erythrocytes. The Pacific Blue™ Mouse Lineage Antibody Cocktail is designed for the flow cytometric identification of hematopoietic progenitors in mouse bone marrow. Components include anti-mouse CD3, clone 17A2; anti-mouse Ly-6G/Ly-6C, clone RB6-8C5; anti-mouse CD11b, clone M1/70; anti-mouse CD45R/B220, clone RA3-6B2; anti-mouse TER-119/Erythroid cells, clone Ter-119.

Materials provided:

1. Pacific Blue™ anti-mCD3/ Pacific Blue™ anti-mLy-6G(Ly-6C)/ Pacific Blue™ anti-mCD11b/ Pacific Blue™ anti-mCD45R(B220)/ Pacific Blue™ anti-mTer-119

Materials not provided:

1. Cell Staining Buffer (Cat. No. 420201)
 2. Isotype Controls
