Product Data Sheet

PE/Dazzle[™] 594 anti-mouse CD366 (Tim-3)

Catalog # / Size:	1270070 / 100 μg 1270065 / 25 μg
Clone:	B8.2C12
Isotype:	Rat IgG1, κ
Immunogen:	mTim-3 protein/Freund adjuvant
Reactivity:	Mouse
Preparation:	The antibody was purified by affinity chromatography and conjugated with PE/Dazzle [™] 594 under optimal conditions. The solution is free of unconjugated PE/Dazzle [™] 594 and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
Concentration:	0.2

Mouse CD366 (Tim-3) transfected cells were stained with CD366 (Tim-3, clone B8.2C12) PE/DazzleTM 594 (filled histogram) or rat IgG1, κ PE/DazzleTM 594 (open histogram).

Applications:

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 0.25 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.
	* PE/Dazzle [™] 594 has a maximum excitation of 566 nm and a maximum emission of 610 nm.
Application Notes:	Clone B8.2C12 only binds to the BALB/c allele of Tim-3.

Description:	CD366 (Tim-3) is a transmembrane protein also known as T cell immunoglobulin and mucin domain containing protein-3. Tim-3 is expressed at high levels on Th1 lymphocytes and CD11b ⁺ macrophages. Tim-3 has also been shown to exist as a soluble protein. Cells expressing Tim-3 are present at high levels in the CNS of animals at the onset of experimental autoimmune encephalomyelitis (EAE), a disease mediated by lymphocytes secreting Th1-like cytokines. Tim-3 has been proposed to inhibit Th1-mediated immune responses and promote immunological tolerance.
