Product Data Sheet

PerCP/Cy5.5 anti-mouse CD335 (NKp46)

Catalog # / Size:	1288050 / 100 μg 1288045 / 25 μg
Clone:	29A1.4
Isotype:	Rat IgG2a, к
Immunogen:	NKP46-IgG1 Fc fusion protein
Reactivity:	Mouse
Preparation:	The antibody was purified by affinity chromatography and conjugated with PerCP/Cy5.5 under optimal conditions. The solution is free of unconjugated PerCP/Cy5.5 and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
Concentration:	0.2

C57BL/6 splenocytes stained with NK-1.1 (PK136) FITC and PerCP/Cy5.5 anti-mouse CD335 (clone 29A1.4)

Applications:	Flow Cytometry		
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 0.25 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.	rat IgG2a, k PerCP/Cy5.5	
	* PerCP/Cy5.5 has a maximum absorption of 482 nm and a maximum emission of 690 nm.	C57BL/6 splenocytes stained with NK-1.1 (PK136) FITC and PerCP/Cy5.5 rat IgG2a isotype	
Application Notes:	Additional reported applications (for the relevant formats) include: immunohistochemical staining of frozen tissue sections ^{1,2} and <i>in vitro</i> activation of NK cells1.	control

Description:	CD335, also known as NKp46, is a single-pass type I membrane protein of 46 kD. It belongs to the natural cytotoxicity receptor (NCR) family and contains two Ig- like (immunoglobulin-like) domains. It's expression is restricted to NK cells and a subset of NKT cells; it's not expressed in CD1d-restricted NKT cells. CD335 is a receptor for viral hemagglutinins and heparan sulfate proteoglycans and is involved in NK cell activation.
