Product Data Sheet

Purified anti-mouse CD144 (VE-cadherin)

Catalog # / Size:	1290010 / 500 μg 1290005 / 50 μg
Clone:	BV13
Isotype:	Rat IgG1, к
Immunogen:	VE-cadherin-Ig fusion protein
Reactivity:	Mouse
Preparation:	The antibody was purified by affinity chromatography.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
Concentration:	0.5

Mouse endothelial cells bEnd.3 was stained with purified CD144 (clone BV13) (filled histogram) or purified rat IgG1 isotype control (open histogram), followed by biotinylated anti-rat IgG and Sav-PE.

Applications:

Applications:	Other
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 0.25 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.
Application Notes:	Clone BV13 recognizes an epitope between aa 45 and 56, and has a binding affinity of 5-15 nM.5 Additional reported applications (for relevant formats) include: Western blotting1, blocking of cell interactions <i>in vivo</i> 1, and immunofluorescence microscopy4.

Description:	CD144, also known as vascular endothelial-cadherin (VE-cadherin), is a 120 kD member of the type II Cadherin family. It is an endothelial specific hemophilic adhesion molecule involved in endothelial cell survival, migration, contact-dependent growth inhibition, and homophilic adhesion. VE-cadherin is essential for maintaining the integrity of the endothelial barrier <i>in vivo</i> .
