## **Product Data Sheet**

## PE anti-mouse CD200R3

Catalog # / Size:	1311025 / 25 μg 1311030 / 100 μg
Clone:	Ba13
Isotype:	Rat IgG2a, к
Immunogen:	Mouse primary basophils
<b>Reactivity:</b>	Mouse
Preparation:	The antibody was purified by affinity chromatography and conjugated with PE under optimal conditions. The solution is free of unconjugated PE and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
<b>Concentration:</b>	NULL

C57BL/6 peripheral blood leukocytes were stained with FcεRlα APC and CD200R3 (clone Ba13) PE (top) or rat IgG2a PE isotype control (bottom). Data shown were gated on lymphocyte population.

20

## **Applications:**

Applications:	Flow Cytometry		
Recommended Usage:	Flow Cytometry Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤0.5 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.	FccRia APC	
Application Notes:	Ba13 recognizes circulating and bone marrow basophils; it also recognizes a subset of mast cells in the peritoneal cavity and skin. Additional reported applications (for the relevant formats) include: stimulation of bone marrow derived basophils to produce IL-4.	FCENIG APC

Description:	CD200R3, also known as CD200RLb and OX-2 Receptor 3, is a disulfide-linked dimeric CD200R-like receptor which belongs to immunoglobulin superfamily. Its positively charged amino acid lysine associates with ITAM- or YxxM motif-bearing adaptor molecules such as DAP12, DAP10, FcRγ, and CD3ζ. CD200R3 functions as an activating receptor to regulate IgE independent immune response.
