Product Data Sheet

PE/Dazzle[™] 594 anti-mouse CD138 (Syndecan-1)

Catalog # / Size:	1312640 / 100 μg 1312635 / 25 μg
Clone:	281-2
Isotype:	Rat IgG2a, κ
Immunogen:	Mouse mammary gland epithelial cell line NMuMG
Reactivity:	Mouse
Preparation:	The antibody was purified by affinity chromatography and conjugated with PE/Dazzle [™] 594 under optimal conditions. The solution is free of unconjugated PE/Dazzle [™] 594 and unconjugated antibody.
Preparation: Formulation:	chromatography and conjugated with PE/Dazzle [™] 594 under optimal conditions. The solution is free of unconjugated PE/Dazzle [™] 594 and

C57BL/6 mouse bone marrow cells were stained with CD19 APC and CD138 (clone 281-2) PE/DazzleTM 594 (top) or rat IgG2a, κ PE/DazzleTM 594 isotype control (bottom). Data shown is gated on lymphoid cell population.

Applications:

	5	
Applications:	Flow Cytometry	
Recommended Usage:	Flow Cytometry Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤0.25 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.	10 10 10 10 10 10
	* PE/Dazzle™ 594 has a maximum excitation of 566 nm and a maximum emission of 610 nm.	
Application Notes:	Additional reported applications (for the relevant formats) include: immunohistochemical staining of frozen tissue3 and formalin-fixed paraffin embedded tissue ⁴ and immunofluorescent staining ^{2,3} .

Rat IgG2a, x Isotype Control

Description: CD138, a member of the syndecan protein family, is a type I integral membrane

For research use only. Not for diagnostic use. Not for resale. Sony Biotechnology Inc. will not be held responsible for patent infringement or other violations that may occur with the use of our products. Sony Biotechnology Inc. 1730 North First Street, San Jose, CA 95112 www.sonybiotechnology.com heparin sulfate proteoglycan also known as Syndecan-1. Syndecan-1 participates in cell proliferation, cell migration, and cell matrix adhesion via interaction with collagen, fibronectin, and other soluble molecules (such as FGF-basic). It is expressed on normal and malignant plasma cells, pre-B cells, mesenchymal cells, epithelial cells, and endothelial cells.
