Product Data Sheet

PE/Cy7 anti-mouse CD49a

Catalog # / Size:	1313035 / 25 μg 1313040 / 100 μg
Clone:	ΗΜα1
lsotype:	Hamster IgG
Immunogen:	Mouse Neuroblastoma Cell Line C1300
Reactivity:	Mouse
Preparation:	The antibody was purified by affinity chromatography and conjugated with PE/Cy7 under optimal conditions. The solution is free of unconjugated PE/Cy7 and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
Concentration:	0.2 mg/ml

C1300 (mouse neuroblastoma cell line) cells were stained with CD49a (clone HMα1) PE/Cy7 (filled histogram) or Armenian hamster IgG PE/Cy7 isotype control (open histogram).

Applications:

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is $\leq 0.5 \ \mu$ g per million cells in 100 μ l volume. It is recommended that the reagent be titrated for optimal performance for each application.
Application Notes:	Additional reported applications (for the relevant format) include: inhibition of cell adhesion and cytokine production ^{1,2} .
Application References:	1. Barczyk M, <i>et al.</i> 2010. <i>Cell Tissue Res.</i> 339:269.
Description:	CD49a is a 1179 aa, type I transmembrane glycoprotein also known as α 1 integrin, VLA-1 α chain, or integrin α 1. It associates antibody v042010 with CD29 (β 1 integrin) to form the VLA-1 complex, a collagen IV and alminin-1 receptor that is expressed on activated T cells, smooth muscle cells, endothelial cells, neuronal cells, fibroblasts, and mesenchymal cells. CD49a is an adhesion molecule and is involved in the regulation of leukocyte migration, T cell proliferation, and cytokine production.
