## **Product Data Sheet**

## PE/Dazzle™ 594 anti-mouse CD185 (CXCR5)

**Catalog # / Size:** 1327610 / 100 μg

1327605 / 25 μg

Clone: L138D7
Isotype: Rat IgG2b, κ

Immunogen: mCXCR5-transfected cells

Reactivity: Mouse

**Preparation:** The antibody was purified by affinity

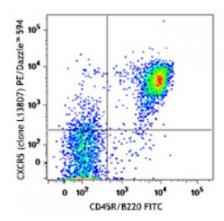

chromatography and conjugated with PE/Dazzle™ 594 under optimal conditions. The solution is free of unconjugated PE/Dazzle™ 594 and

unconjugated antibody.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide.

Concentration: 0.2

C57BL/6 mouse splenocytes were stained with CD45R/B220 FITC and CXCR5 (clone L138D7) PE/Dazzle™

594.

## **Applications:**

**Applications:** Flow Cytometry

Recommended

**Usage:** 

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is  $\leq 0.25$  microg per million cells in 100 microL volume. It is

recommended that the reagent be titrated for optimal performance for each

application.

\* PE/Dazzle™ 594 has a maximum excitation of 566 nm and a maximum emission

of 610 nm.

Application

Notes:

Clone L138D7 staining works optimally at room temperature or 4°C. Unlike other

chemokine receptor antibodies, avoid using L138D7 at 37°C.

**Description:** CD185 is also known as CXCR5. It is the receptor for chemokine CXCL13/BLC,

which is chemotactic for B cells. CXCR5 is expressed on B cells and a subset of T

cells in the spleen, neuronal tissue, lymph nodes, and bone marrow. It is

important for migration of B cells into the B cell follicles of the spleen and Peyer's patches. Follicular helper T cells (Tfh) also express CXCR5 and the ability of these cells to migrate to the lymph node is modulated by the balanced expression of

CCR7 and CXCR5.
