APC/Cyanine7 anti-mouse CD45

Catalog # / Size:	1386015 / 25 μg 1386020 / 100 μg
Clone:	S18009F
lsotype:	Rat IgG2b, к
Immunogen:	Recombinant mouse CD45
Reactivity:	Mouse
Preparation:	The antibody was purified by affinity chromatography and conjugated with APC/Cyanine7 under optimal conditions.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide
Concentration:	0.2 mg/mL

C57BL/6 splenocytes were stained with CD45 (clone S18009F) APC/Cyanine7 (filled histogram) or rat IgG2b, ? APC/Cyanine7 isotype control (open histogram).

Applications:

Applications: Flow Cytometry

Description:	CD45 is a 180-240 kD glycoprotein also known as the leukocyte common antigen (LCA), T200, or Ly-5. It is a member of the protein tyrosine phosphatase (PTP) family, expressed on all hematopoietic cells except mature erythrocytes and platelets. There are different isoforms of CD45 that arise from variable splicing of exons 4, 5, and 6, which encode A, B, and C determinants, respectively. CD45 plays a key role in TCR and BCR signal transduction. These isoforms are very specific to the activation and maturation state of the cell as well as cell type. The primary ligands for CD45 are galectin-1, CD2, CD3, CD4, TCR, CD22, and Thy-1.
