## **Product Data Sheet**

## APC/Cy7 anti-rat CD4

Catalog # / Size:	1607585 / 25 μg 1607590 / 100 μg	
Clone:	W3/25	
Isotype:	Mouse IgG1, к	
Immunogen:	Rat thymocyte membrane glycoproteins	2
<b>Reactivity:</b>	Rat	
Preparation:	The antibody was purified by affinity chromatography, and conjugated with APC/Cy7 under optimal conditions. The solution is free of unconjugated APC/Cy7 and unconjugated antibody.	
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.	L
<b>Concentration:</b>	0.2	V

LOU rat splenocytes stained with W3/25 APC/Cy7

## **Applications:**

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is $\leq 0.5$ microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.
Application Notes:	The W3/25 antibody has been shown to inhibit IL-2 production by T helper cells and to prevent autoimmune T cell transfer in an MBP induced EAE model <i>in vivo</i> . Additional reported applications (for the relevant formats) include: immunohistochemistryof acetone-fixed frozen sections <sup>1,2</sup> , inhibition of IL-2 production3, inhibition of MBP-induced T cell activation in EAE transfer model3.

Description:	CD4 is a 55 kD glycoprotein also known as T4. Rat CD4 is a member of the immunoglobulin superfamily and is expressed on majority of thymocytes, macrophages, and a peripheral T cell subset (T helper cells). CD4 is a T cell co-receptor that interacts with the MHC class II molecule and is involved in T cell activation.
