## **Product Data Sheet**

104

## **APC anti-rat CD45RA**

Catalog # / Size:	1611570 / 100 μg 1611565 / 25 μg	
Clone:	OX-33	
Isotype:	Mouse IgG1, κ	· · · · · · · · · · · · · · · · · · ·
Immunogen:	Leukocyte common antigen purified from rat splenocytes.	elative Cell Number
<b>Reactivity:</b>	Rat	
Preparation:	The antibody was purified by affinity chromatography and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.	10 <sup>0</sup> 10 <sup>1</sup> 10 <sup>2</sup> 10 <sup>3</sup> 10 <sup>4</sup> Log Fluorescence Intensity
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.	LOU rat splenocytes stained with OX-33 APC
<b>Concentration:</b>	0.2	

## **Applications:**

-

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is $\leq 0.25$ microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application.
Application Notes:	Additional reported applications (for the relevant formats) include: immunohistochemistry of acetone-fixed frozen sections1.
Application References:	1. Smith T, <i>et al.</i> 2000. <i>Nature Med.</i> 6:62. (IHC)
Description:	CD45 is a protein tyrosine phosphatase with multiple isoforms differing as a result of alternative splicing of the extracellular domain and glycosylation. CD45 is expressed on all hematopoietic cells except erythrocytes and platelets. CD45RA is one of the CD45 isoforms with a molecular weight of 200-220 kD. It is expressed almost exclusively on B cells. CD45 functions in signal transduction through T and B cell antigen receptors. CD45 has been shown to interact with various proteins,
