Product Data Sheet

Purified anti-human CD56 (NCAM)

| Catalog # / Size: | 2123010 / 100 μg 2123005 / 25 μg |
|-----------------------|---|
| Clone: | MEM-188 |
| Isotype: | Mouse IgG2a, к |
| Immunogen: | KG-1 human acute myelogenous leukemia cell line |
| Reactivity: | Human |
| Preparation: | The antibody was purified by affinity chromatography. |
| Formulation: | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide. |
| Workshop Number: | VI NK26 |
| Concentration: | 0.5 |

Human peripheral blood lymphocytes stained with purified MEM-188, followed by anti-mouse IgGs FITC

Applications:

| Applications: | Other |
|----------------------------|--|
| Recommended Usage: | Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is \leq 2.0 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application. |
| Application Notes: | Additional reported applications (for the relevant formats) include: immunoprecipitation, immunohistochemical staining of formalin-fixed paraffin- embedded tissue sections, and Western blotting (non-reducing). |

| Description: | CD56 is a single transmembrane glycoprotein also known as N-CAM (Neural Cell Adhesion Molecule), Leu 19, or NKH1, It is a member of the la superfamily. The |

Adhesion Molecule), Leu-19, or NKH1. It is a member of the Ig superfamily. The 140 kD isoform is expressed on NK cells and NK-T cells. CD56 is also expressed in the brain (cerebellum and cortex) and at neuromuscular junctions. Certain large granular lymphocyte (LGL) leukemias, small-cell lung carcinomas, neuronal derived tumors, myelomas, and myeloid leukemias also express CD56. CD56 plays a role in homophilic and heterophilic adhesion via binding to itself or heparin sulfate.
