Product Data Sheet

PerCP/Cy5.5 anti-human CD86

| Catalog # / Size: | 2127100 / 100 tests 2127095 / 25 tests | $I_{10}^{0} I_{10}^{0} I_{10}^{0$ |
|-----------------------|--|--|
| Clone: | IT2.2 | |
| Isotype: | Mouse lgG2b, κ | |
| Reactivity: | Human | |
| Preparation: | The antibody was purified by affinity chromatography, and conjugated with PerCP/Cy5.5 under optimal conditions. The solution is free of unconjugated PerCP/Cy5.5 and unconjugated antibody. | |
| Formulation: | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA). | |
| Workshop Number: | VI CD86.8 | |
| Concentration: | Lot-specific | |

Applications:

| Applications: | Flow Cytometry |
|----------------------------|---|
| Recommended Usage: | Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application. |
| | * PerCP/Cy5.5 has a maximum absorption of 482 nm and a maximum emission of 690 nm. |
| Application Notes: | Additional reported applications (for the relevant formats) include: immunohistochemical staining of acetone-fixed frozen tissue sections ⁶ , Western blotting3, and blocking of T cell activation ^{2,4,5} . The LEAF ^{m} purified antibody (Endotoxin <0.1 EU/µg, Azide-Free, 0.2 µm filtered) is recommended for functional assays (Cat. No. 305410). |

| Description: | CD86 is an 80 kD immunoglobulin superfamily member also known as B7-2, B70, and Ly-58. CD86 is expressed on activated B and T cells, monocytes/macrophages, dendritic cells, and astrocytes. CD86, along with CD80, is the ligand of CD28 and CD152 (CTLA-4). CD86 is expressed earlier in the immune response than CD80. CD86 has also been shown to be involved in immunoglobulin class-switching and triggering of NK cell-mediated cytotoxicity. CD86 binds to CD28 to transduce costimulatory signals for T cell activation, |

proliferation, and cytokine production. CD86 can bind to CD152 as well, also known as CTLA-4, to deliver an inhibitory signal to T cells.
