## **Product Data Sheet**

## Alexa Fluor<sup>®</sup> 647 anti-human CD95 (Fas)

| Catalog # / Size:     | 2128090 / 100 tests  | Г                      |
|-----------------------|--|------------------------|
| Clone:                | DX2  |                        |
| Isotype:              | Mouse lgG1, к  | Relative Cell Number   |
| Immunogen:            | CD95 transfected L cells   |                        |
| <b>Reactivity:</b>    | Human  |                        |
| Preparation:          | The antibody was purified by affinity chromatography, and conjugated with Alexa Fluor® 647 under optimal conditions. |                        |
| Formulation:          | Phosphate-buffered solution, pH 7.2,<br>containing 0.09% sodium azide and<br>0.2% (w/v) BSA (origin USA).            | 10 <sup>0</sup>        |
| Workshop<br>Number:   | VI C-64  | Huma<br>lymph<br>Alexa |
| <b>Concentration:</b> | NULL   |                        |

Human peripheral blood lymphocytes stained with DX2 Alexa Fluor® 647

## **Applications:**

| Applications:              | Flow Cytometry  |
|----------------------------|---|
| Recommended<br>Usage:      | Each lot of this antibody is quality control tested by immunofluorescent staining<br>with flow cytometric analysis. For flow cytometric staining, the suggested use of<br>this reagent is 5 microL per million cells or 5 microL per 100 microL of whole<br>blood. It is recommended that the reagent be titrated for optimal performance for<br>each application.  |
|                            | $^{*}$ Alexa Fluor $^{ m I\!R}$ 647 has a maximum emission of 668 nm when it is excited at 633nm / 635nm.   |
| Application<br>Notes:      | The DX2 antibody is useful for inducing apoptosis of Fas-positive cells. Additional reported applications (for the relevant formats) include: <i>in vitro</i> induction of apoptosis3 (DX2 antibody is required to be cross-linked for effective induction of apoptosis) and immunohistochemical staining <sup>4,5</sup> of acetone-fixed frozen tissue sections and formalin-fixed paraffin-embedded tissue sections. The LEAF <sup>™</sup> purified antibody (Endotoxin <0.1 EU/µg, Azide-Free, 0.2 µm filtered) is recommended for functional assays (Cat. No. 305614).  |
|                            | <b>Note:</b> EOS9.1 antibody (Cat. No. 305704) can induce apoptosis without cross-<br>linking.  |

**Description:** CD95 is a 45 kD single chain type I glycoprotein also known as Fas, APO-1, and TNFRSF6. It is a member of the TNF receptor superfamily. CD95 is expressed on T and B lymphocytes, monocytes, neutrophils, and fibroblasts. CD95 expression is upregulated by activation. The extracellular region of CD95 binds to CD178 (Fas ligand). CD178 binding to CD95 induces apoptosis and has been shown to play a role in the maintenance of peripheral tolerance.
