Alexa Fluor[®] 700 anti-human CD95 (Fas)

Catalog # / Size:	2128240 / 100 tests 2128235 / 25 tests	
Clone:	DX2	
lsotype:	Mouse IgG1, к	ē
Immunogen:	CD95 transfected L cells	Relative Cell Number
Reactivity:	Human, Non-human primate, Other	ve Cell
Preparation:	The antibody was purified by affinity chromatography and conjugated with Alexa Fluor® 700 under optimal conditions. The solution is free of unconjugated Alexa Fluor® 700.	Relati
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA).	Humai Iymph
Workshop Number:	VI C-64	CD95 Fluor Mouse
Concentration:	Lot-specific	isotyp

Human peripheral blood lymphocytes were stained with CD95 (Fas, clone DX2) Alexa Fluor® 700 (filled histogram) or Mouse IgG1, κ Alexa Fluor® 700 sotype control (open histogram).

Applications:

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 μ l per million cells or 5 μ l per 100 μ l of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.
	* Alexa Fluor® 700 has a maximum emission of 719 nm when it is excited at 633 nm / 635 nm. Prior to using Alexa Fluor® 700 conjugate for flow cytometric analysis, please verify your flow cytometer's capability of exciting and detecting the fluorochrome.
Application Notes:	The DX2 antibody is useful for inducing apoptosis of Fas-positive cells. Additional reported applications (for the relevant formats) include: <i>in vitro</i> induction of apoptosis ³ (DX2 antibody is required to be cross-linked for effective induction of apoptosis) and immunohistochemical staining ^{4,5} of acetone-fixed frozen tissue sections and formalin-fixed paraffin-embedded tissue sections.

Description:	CD95 is a 45 kD single chain type I glycoprotein also known as Fas, APO-1, and TNFRSF6. It is a member of the TNF receptor superfamily. CD95 is expressed on T and B lymphocytes, monocytes, neutrophils, and fibroblasts. CD95 expression is upregulated by activation. The extracellular region of CD95 binds to CD178 (Fas ligand). CD178 binding to CD95 induces apoptosis and has been shown to play a role in the maintenance of peripheral tolerance.
