control (open histogram).

Brilliant Violet 711[™] anti-human TCR α/β

Catalog # / Size:	2133700 / 100 tests 2133695 / 25 tests	· · · · · · · · · · · · · · · · · · ·
Clone:	IP26	3
lsotype:	Mouse IgG1, к	-10 ³ 0 10 ³ 10 ⁴ 10 ⁵ Log Fluorescence Intensity
Reactivity:	Human	
Preparation:	The antibody was purified by affinity chromatography and conjugated with Brilliant Violet 711 [™] under optimal conditions. The solution is free of unconjugated Brilliant Violet 711 [™] and unconjugated antibody.	
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and BSA (origin USA).	Human peripheral blood lymphocytes were stained with anti-human TCR α/β (clone IP26) Brilliant Violet 711™ (filled histogram) or mouse IgG1, κ Brilliant Violet 711™ isotype
Concentration:	Lot-specific	

Applications:

Applications: Flow Cytometry

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 μl per million cells in 100 μl staining volume or 5 μl per 100 μl of whole blood.

Brilliant Violet 711[™] excites at 405 nm and emits at 711 nm. The bandpass filter 710/50 nm is recommended for detection, although filter optimization may be required depending on other fluorophores used. Be sure to verify that your cytometer configuration and software setup are appropriate for detecting this channel. Refer to your instrument manual or manufacturer for support. Brilliant Violet 711[™] is a trademark of Sirigen Group Ltd.

This product is subject to proprietary rights of Sirigen Inc. and is made and sold under license from Sirigen Inc. The purchase of this product conveys to the buyer a non-transferable right to use the purchased product for research purposes only. This product may not be resold or incorporated in any manner into another product for resale. Any use for therapeutics or diagnostics is strictly prohibited. This product is covered by U.S. Patent(s), pending patent applications and foreign equivalents.

Application
Notes:Additional reported applications (for the relevant formats) include: T cell
activation. When co-staining with anti-CD3, we recommend using clone
UCHT1, since we have confirmed that IP26 does not compete with this
clone. Other anti-CD3 clones may compete out the binding of IP26.

Application 1. Marchalonis J, *et al.* 2002. *J. Mol. Recognit.* 15:260. **References:**

Description:	1: The IP26 antibody reacts with a monomorphic determinant of the α/β T-cel receptor, which is expressed on greater than 95% of normal peripheral	
	blood CD3 ⁺ T cells. The α/β TCR recognizes a peptide bound to MHC leading to T-cell activation.
