Product Data Sheet

APC anti-human CD2

Catalog # / Size:	2146115 / 25 tests 2146120 / 100 tests
Clone:	TS1/8
Isotype:	Mouse IgG1, к
Reactivity:	Human
Preparation:	The antibody was purified by affinity chromatography and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA).
Workshop Number:	V S025
Concentration:	Lot-specific

Human peripheral blood lymphocytes stained with CD3 Brilliant Violet 421[™] and antihuman CD2 (clone TS1/8) APC (top) or mouse IgG1 APC isotype control (bottom).

Applications:

Applications:	Flow Cytometry	outrol
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.	CD3 Brilliant Violet 421 ^w
Application Notes:	Additional reported applications (for the relevant formats) include: blocking of T cell activation, and partial blocking of B cell costimulation2. The LEAF $\stackrel{\text{m}}{=}$ purified antibody (Endotoxin <0.1 EU/µg, Azide-Free, 0.2 µm filtered) is recommended for functional assays (Cat. No. 309212).

Description:	CD2 is a 50 kD type I transmembrane glycoprotein also known as LFA-2, T11, and sheep red blood cell receptor (SRBC-R). This immunoglobulin superfamily member is expressed on thymocytes, T lymphocytes, NK cells, and thymic B cell subsets. The major ligand for CD2 is CD58 (also known as LFA-3). CD2 has also been reported to bind CD48, CD59, and CD15. CD2 plays a critical role in alternative T cell activation, T cell signaling, and cell-cell adhesion.
