Product Data Sheet

PE anti-human CD10

Catalog # / Size:	2161020 / 100 tests 2161015 / 25 tests	
Clone:	HI10a	
Isotype:	Mouse IgG1, к	aqu
Reactivity:	Human	al Nr
Preparation:	The antibody was purified by affinity chromatography, and conjugated with PE under optimal conditions. The solution is free of unconjugated PE and unconjugated antibody.	Relative Cell Number
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA).	10 ¹ 1 Human pe
Workshop Number:	V CD10.7	granulocy CD10 (clo
Concentration:	Lot-specific	histogram isotype co

Human peripheral blood granulocytes were stained with CD10 (clone HI10a) PE (filled histogram) or mouse IgG1, κ PE isotype control (open histogram).

Applications:

Applications:	Flow Cytometry
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. Test size products are transitioning from 20 microL to 5 microL per test . Please check your vial or your CoA to find the suggested use of this reagent per million cells in 100 microL staining volume or per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.
Application Notes:	Additional reported (for the relevant formats) applications include: immunohistochemistry ⁶ .

Description:	CD10 is a 100 kD neutral endopeptidase and a member of the metalloprotease family. It is a type II transmembrane protein also known as common acute lymphoblastic leukemia antigen (CALLA), enkephalinase, and neprilysin. CD10 is expressed on B cell precursors, T cell precursors, and neutrophils. CD10 is involved in B cell development and has been shown to bind opioid enkephalins, bradykinin, angiotensins I and II, and other biologically active peptides.
