FITC anti-human CD268 (BAFF-R)

Catalog # / Size: 2184520 / 100 tests

Clone: 11C1

Isotype: Mouse IgG1, κ

Immunogen: BAFF-R-L1.2 transfectants

Reactivity: Human

Preparation: The antibody was purified by affinity

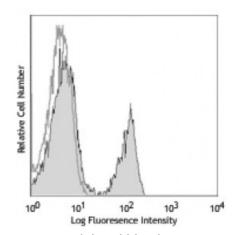

chromatography, and conjugated with FITC under optimal conditions. The solution is free of unconjugated FITC.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide and

0.2% (w/v) BSA (origin USA).

Concentration: Lot-specific

Human peripheral blood lymphocytes stained with 11C1 FITC

Applications:

Applications: Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. **Test size products are transitioning from 20 microL to 5 microL per test**. Please check your vial or your CoA to find the suggested use of this reagent per million cells in 100 microL staining volume or per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

Application 1. Ng LG, et al. 2004. J. Immunol. 173:807. (FC IHC)

References: 2. Personal communication. (Block)

Description: B cell-activating factor receptor (BAFF-R) is a 19 kD type III membrane protein. It

belongs to TNFR superfamily, also known as TNFRSF member 13C (TNFRSF13C), BAFF receptor 3 (BR3), or CD268. BAFF-R is expressed on mature B cells, B cell lymphoma, and T cell subset. BAFF-R is the major receptor for BAFF/BLys (or TALL-1, THANK) which binds to TACI and BCMA as well. The interaction of BAFF with BAFF-R promotes NF-kB activation and plays predominant roles in B-cell maturation and survival as well as costimulates T cell activation and proliferation. TRAF3 is a BAFF-R intracellularly associated protein, which negatively regulates

BAFF-R-mediated NF-kB activation.
