Product Data Sheet

APC anti-human CD324 (E-Cadherin)

Catalog # / Size:	2220540 / 100 tests 2220535 / 25 tests	
Clone:	67A4	- Relative Cell Number
Isotype:	Mouse lgG1, κ	
Immunogen:	T-47D cells	
Reactivity:	Human	
Preparation:	The antibody was purified by affinity chromatography, and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.	
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA).	Hu (HT
Concentration:	Lot-specific	67/ mo

Human colon carcinoma cell line (HT29) stained with CD324 (clone 67A4) APC (filled histogram), or mouse IgG1, κ APC (open histogram).

Applications:

Applications: Flow Cytometry Each lot of this antibody is quality control tested by immunofluorescent staining Recommended with flow cytometric analysis. Test size products are transitioning from 20 Usage: microL to 5 microL per test. Please check your vial or your CoA to find the suggested use of this reagent per million cells in 100 microL staining volume or per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application. Application 1. Armeanu S, et al. 1995. J. Cell Biol. 131:243. **References:** 2. Bühring HJ, et al. 1996. Description: The 67A4 antibody recognizes human CD324 also known as E-cadherin, cadherin-1, and UVO. CD324, a member of the cadherin superfamily, is a calciumdependent, transmembrane cell-cell adhesion glycoprotein composed of 4 extracellular cadherin repeats and a highly conserved cytoplasmic tail region with a predicted molecular weight of approximately 100 kD. CD324 is widely expressed in epithelial cells in the colon, uterus, liver, keratinocytes, brain, heart, muscle, kidney, and pancreas, as well as erythroid cells. CD324 functions as a cell adhesion molecule involved in development, bacterial pathogenesis, and tumor invasion. In bacterial pathogenesis, the ectodomain of CD324 mediates bacterial adhesion to mammalian cells, while the cytoplasmic domain is required for internalization. CD324 binds to the $\alpha_{\rm E}\beta_7$ integrin to mediate cell adhesion and also interacts with a number of intracellular proteins including including erbin, ezrin, caspase-3, caspase 8, β -catenin, presenilin 1, casein kinase II, as well as other extracellular proteins including the EGF receptor. CD324 is phosphorylated

For research use only. Not for diagnostic use. Not for resale. Sony Biotechnology Inc. will not be held responsible for patent infringement or other violations that may occur with the use of our products. Sony Biotechnology Inc. 1730 North First Street, San Jose, CA 95112 www.sonybiotechnology.com on multiple residues (S857, S866, S870, S872), and can be proteolytically cleaved at reside D769 by caspase-3. The 67A4 antibody has been shown to be useful for flow cytometry.
