Product Data Sheet

APC anti-human CD49a

Catalog # / Size: 2241570 / 100 tests

2241565 / 25 tests

Clone: TS2/7

Isotype: Mouse IgG1, κ

Immunogen: Human CTL line

Reactivity: Human

Preparation: The antibody was purified by affinity

chromatography and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and

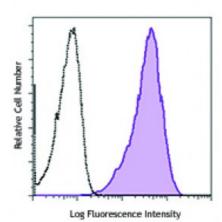

unconjugated antibody.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide and

0.2% (w/v) BSA (origin USA).

Concentration: Lot-specific

HeLa cells (Human cervical cancer cell lines) were stained with CD49a (clone TS2/7) APC (filled histogram) or mouse IgG1, κ APC isotype control (open histogram).

Applications:

Applications: Flow Cytometry

Recommended Each lot of this antibody is quality control tested by immunofluorescent staining

Usage: with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole

this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for

each application.

Application Additional reported applications include: immunoprecipitation (1) and

Notes: immunohistochemical staining (1) of acetone-fixed frozen tissue sections

Description: CD49a is a 200 kD type I transmembrane glycoprotein also known as α_1 integrin,

VLA-1 α chain, or Integrin α_1 . It associates with CD29 (β_1 integrin) to form VLA-1 complex, a collagen IV and alminin-1 receptor. It is expressed on activated T cells,

monocytes, NK cells, smooth muscle cells, neuronal cells, fibroblasts, and mesenchymal cells. CD49a is an adhesion molecule and is involved in the regulation of leukocyte migration, T cell proliferation, and cytokine production.
