Product Data Sheet

APC anti-human CD273 (B7-DC, PD-L2)

Catalog # / Size:	2248040 / 100 tests	
Clone:	24F.10C12	L I
Isotype:	Mouse IgG2a, κ	Cell Number
Immunogen:	Human PD-L2 cDNA	
Reactivity:	Human	
Preparation:	The antibody was purified by affinity chromatography, and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.	Relative
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA).	10 ⁰ Monocy
Concentration:	Lot-specific	stained

Monocyte-derived dendritic cells stained with 24F.10C12 APC

Applications:

Applications:Flow CytometryRecommended
Usage:Each lot of this antibody is quality control tested by immunofluorescent staining
with flow cytometric analysis. Test size products are transitioning from 20
microL to 5 microL per test. Please check your vial or your CoA to find the
suggested use of this reagent per million cells in 100 microL staining volume or
per 100 microL of whole blood. It is recommended that the reagent be titrated for
optimal performance for each application.

Description: CD273, known as B7-DC, is also called programmed death ligand 2 (PDL2). This ligand is a 25 kD type I transmembrane protein and a member of B7 family within the immunoglobulin receptor superfamily and is expressed on a subset of dendritic cells, liver and a small subset of macrophages as well as a few transformed cell lines. CD273 has been reported to be stimulatory on dendritic cells when cross-linked and to inhibit T cell activation upon engaging the PD-1 receptor. CD273 has also been reported to bind to an alternative receptor and to mediate T cell activation through such non-PD1 mediated interactions.
