Product Data Sheet

APC/Fire™ 750 anti-human CD44

Catalog # / 2294090 / 100 tests

Size: 2294085 / 25 tests

Clone: BJ18

Isotype: Mouse IgG1, κ

Immunogen: Normal human PBL

Reactivity: Human, Non-human primate, Other

Preparation: The antibody was purified by affinity

chromatography and conjugated with

APC/Fire™ 750 under optimal

conditions.

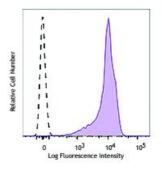

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide and

0.2% (w/v) BSA (origin USA).

Workshop Number: VI A034

Concentration: Lot-specific

Human peripheral blood lymphocytes were stained with CD44 (clone BJ18) APC/Fire™ 750 (filled histogram) or mouse IgG1, κ APC/Fire™ 750 isotype control

(open histogram).

Applications:

Applications: Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent

staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 μ l per million cells in 100 μ l staining volume or 5 μ l per

100 µl of whole blood.

* APC/Fire™ 750 has a maximum excitation of 650 nm and a maximum

emission of 787 nm.

Application Notes:

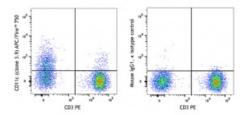

Additional reported applications (for the relevant formats) include:

Western blotting and

immunohistochemical staining of

frozen tissue sections.

leukocyte aggregation.

Human peripheral blood lymphocytes were stained with PE anti-human CD3 and

APC/Fire[™] 750 anti-human CD11c (clone 3.9) (left) or mouse IgG1, κ APC/Fire[™] 750 isotype control

(right).

Description:

CD44 is a 80-95 kD glycoprotein also known as Hermes, Pgp1, H-CAM, or HUTCH. It is expressed on all leukocytes, endothelial cells, hepatocytes, and mesenchymal cells. As B and T cells become activated or progress to the memory stage, CD44 expression increases from a low or mid level of intensity to high expression levels. Thus, CD44 has been reported to be a valuable marker for memory cell subsets. CD44 is an adhesion molecule involved in leukocyte attachment to and rolling on endothelial cells, homing to peripheral lymphoid organs and to the sites of inflammation, and
