## APC/Cy7 anti-human CD161

Catalog # / Size:	2299635 / 25 tests 2299640 / 100 tests
Clone:	HP-3G10
Isotype:	Mouse IgG1, к
Immunogen:	Human NK cells
<b>Reactivity:</b>	Human
Preparation:	The antibody was purified by affinity chromatography and conjugated with APC/Cy7 under optimal conditions. The solution is free of unconjugated APC/Cy7 and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and $0.2\%$ (w/v) BSA (origin USA).
<b>Concentration:</b>	Lot-specific

Human peripheral blood lymphocytes were stained with CD4 PE and CD161 (clone HP-3G10) APC/Cy7 (top) or mouse IgG1, κ APC/Cy7 isotype control (bottom).

## **Applications:**

		10*
Applications:	Flow Cytometry	5
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.	Mouse IgG1, K APC/Cy7 0 0 0 0 0 0 0 0 0 0 0

## **Product Data Sheet**

Description:	CD161 is a type II transmembrane glycoprotein, also known as NKR-P1A, that is expressed as a 40-44 kD homodimer. It is a member of the C-type lectin superfamily. CD161 is expressed on a majority of NK cells, NKT cells, and subsets
	of peripheral T cells and CD3 <sup>+</sup> thymocytes. It has been reported that Th17 cells are a subpopulation of CD4 <sup>+</sup> CD161 <sup>+</sup> CCR6 <sup>+</sup> cells. While the biological function of CD161 is not clear, it has been suggested to serve either as a stimulatory receptor or to inhibit NK cell-mediated cytotoxicity and cytokine production. LLT-1 (lectin-like transcript-1, also named as osteoclast inhibitory lectin or CLEC2D) is the ligand of CD161.
