Product Data Sheet

APC anti-human CD4

| Catalog # / Size: | 2323070 / 100 tests 2323065 / 25 tests | |
|-----------------------|---|---|
| Clone: | SK3 | |
| Isotype: | Mouse lgG1, κ | · 译 |
| Reactivity: | Human | N 10 |
| Preparation: | The antibody was purified by affinity chromatography, and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody. | Belative Co |
| Formulation: | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA). | 10 ⁰ 10 ¹ 10 ² 10 ³ 10 ⁴ Log Fluorescence Intensity Human peripheral blood |
| Concentration: | Lot-specific | lymphocytes stained with SK3 APC |

Applications:

| Applications: | Flow Cytometry |
|----------------------------|--|
| Recommended Usage: | Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. Test size products are transitioning from 20 microL to 5 microL per test . Please check your vial or your CoA to find the suggested use of this reagent per million cells in 100 microL staining volume or per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application. |

| Description: | CD4, also known as T4, is a 55 kD single-chain type I transmembrane glycoprotein expressed on most thymocytes, a subset of T cells, and monocytes/macrophages. CD4, a member of the Ig superfamily, recognizes antigens associated with MHC class II molecules and participates in cell-cell interactions, thymic differentiation, and signal transduction. CD4 acts as a primary receptor for HIV, binding to HIV gp120. CD4 has also been shown to interact with IL-16. |
