## **Product Data Sheet**

## PerCP/Cy5.5 anti-human CD3

Catalog # / Size: 2324040 / 100 tests

2324035 / 25 tests

Clone: SK7

**Isotype:** Mouse IgG1, κ

Reactivity: Human

**Preparation:** The antibody was purified by affinity

chromatography, and conjugated with PerCP/Cy5.5 under optimal conditions. The solution is free of unconjugated PerCP/Cy5.5 and unconjugated

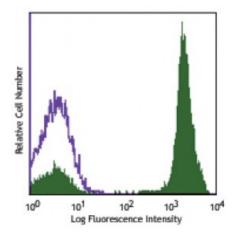

antibody.

Formulation: Phosphate-buffered solution, pH 7.2,

containing 0.09% sodium azide and

0.2% (w/v) BSA (origin USA).

Concentration: Lot-specific

Human peripheral blood lymphocytes stained with SK7 PerCP/Cy5.5

## Applications:

**Applications:** Flow Cytometry

Recommended

Usage:

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

Application

Additional reported application (for the relevant formats) include:

**Notes:** 

immunohistochemical staining of frozen tissue sections<sup>4,5,8</sup>, immunofluorescent

staining<sup>6</sup>, and Western blotting3.

**Description:** CD3ε is a 20 kD chain of the CD3/T-cell receptor (TCR) complex, which is

composed of two CD3 $\epsilon$ , one CD3 $\gamma$ , one CD3 $\delta$ , one CD3 $\zeta$  (CD247), and a T-cell receptor ( $\alpha/\beta$  or  $\gamma/\delta$ ) heterodimer. It is found on all mature T cells, NK T cells, and some thymocytes. CD3, also known as T3, is a member of the immunoglobulin superfamily that plays a role in antigen recognition, signal transduction, and T

cell activation.
