## SONY

## **Product Data Sheet**

## **APC** anti-human IgD

Catalog # / Size:	2341105 / 25 tests 2341110 / 100 tests
Clone:	IA6-2
Isotype:	Mouse IgG2a, к
Immunogen:	Human IgD
<b>Reactivity:</b>	Human
Preparation:	The antibody was purified by affinity chromatography and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA).
<b>Concentration:</b>	Lot-specific

Human peripheral blood lymphocytes were stained with CD19 PE and IgD (clone IA6-2) APC (top) or mouse IgG2a, κ APC isotype control (bottom).

105 -

## **Applications:**

Applications:	Flow Cytometry	
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.	
Application Notes:	Additional reported applications (for the relevant formats) include: immunohistochemical staining of paraformaldehyde fixed frozen sections.4

Description:	IgD, a member of the immunoglobulin (Ig) family, is expressed in naïve B cells. It has 3 Ig-like domains and exists in a transmembrane and a soluble form. In general, IgD is not secreted and usually its expression is lost after the Ig isotype switch. After antigen binding, IgD signals through the CD79a/CD79b (Ig $\alpha$ /Ig $\beta$ ) heterodimer, resulting in the activation of the B cell.
