Product Data Sheet

PE anti-human CD235a (Glycophorin A)

Catalog # / Size:	2345525 / 25 μg 2345530 / 100 μg
Clone:	HI264
Isotype:	Mouse IgG2a, к
Reactivity:	Human
Preparation:	The antibody was purified by affinity chromatography and conjugated with PE under optimal conditions. The solution is free of unconjugated PE and unconjugated antibody.
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.
Workshop Number:	VII 70312
Concentration:	0.2

Human red blood cells stained with HI264 PE

Applications:

Applications: Flow Cytometry Each lot of this antibody is quality control tested by immunofluorescent staining Recommended Usage: with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is ≤ 0.5 microg per million cells in 100 microL volume. It is recommended that the reagent be titrated for optimal performance for each application. Application 1. Mason D, et al. Eds. 2002. Leucocyte Typing VII:White Cell Differentiation Antigens. PubMed **Description:** CD235a (Glycophorin A) is member of the glycophorin A family. It is a type I sialoglycoprotein with a molecular weight of 10 kD, present in the cell membrane as a homodimer. Glycophorin A is expressed by erythroid precursors and erythrocytes. It carries the antigen determinants for the MNS blood groups and has been proposed to be an inhibitor of hemagglutination and hemolysis. Glycophorin A binds siglec 5, the erythrocyte binding antigen (EBA-175) of P. falciparum and some viruses, including influenza virus and hepatitis A virus. Antigen 1. Reid ME. 2009.
