

APC anti-human CD294 (CRTH2)

Catalog # / Size: 2350550 / 100 tests
2350545 / 25 tests

Clone: BM16

Isotype: Rat IgG2a, κ

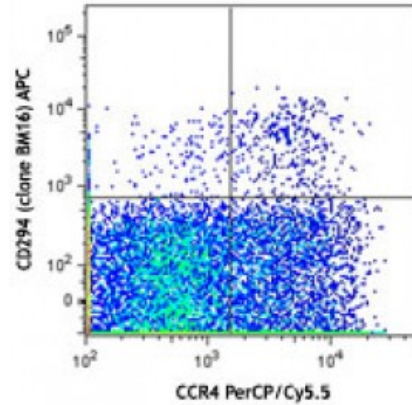

Immunogen: Rat cell line TART/B19-12.10 transfected with human CRTH2

Reactivity: Human

Preparation: The antibody was purified by affinity chromatography and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA).

Concentration: Lot-specific

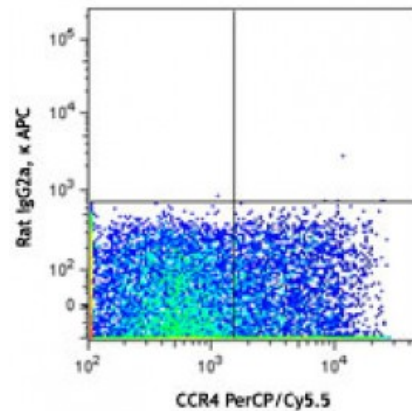

Human peripheral blood lymphocytes were stained with CD4 PE, CCR4 PerCP/Cy5.5, and CD294 (clone BM16) APC (top) or rat IgG2a, κ APC isotype control (bottom). Data shown was gated on the CD4⁺ population.

Applications:

Applications: Flow Cytometry

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 microL per million cells or 5 microL per 100 microL of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

Application Notes: This product is sold under license agreement with BML, Inc for research use only.

Description: CD294, also known as CRTH2, is a seven-transmembrane protein coupled with heterotrimeric G proteins. CRTH2 is the prostaglandin D2 receptor and is expressed by Th2 cells, eosinophils, and basophils. CD294 prevents the apoptosis of Th2 cells and mediates the chemotaxis of CRTH2 expressing cells to the sites of allergic inflammation, such as the asthmatic lung.
