## APC/Cyanine7 anti-human CD63

Catalog # / Size:	2365230 / 100 tests 2365225 / 25 tests	
Clone:	H5C6	h 🎽
lsotype:	Mouse IgG1, к	5 II
Immunogen:	T cell line HPB-ALL	
<b>Reactivity:</b>	Human, Non-human primate, Other	Aelative Cell Number
Preparation:	The antibody was purified by affinity chromatography and conjugated with APC/Cyanine7 under optimal conditions.	0 Log Fluorescence Intensity
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA)	Thrombin-activated human
Workshop Number:	HCDM listed	peripheral blood platelets were stained with CD63 (clone H5C6) APC/Cyanine7 (filled histogram) or mouse lgG1, κ APC/Cyanine7 isotype control (open histogram).
Concentration:	Lot-specific	

## **Applications:**

Applications:	Flow Cytometry	
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 $\mu$ L per million cells in 100 $\mu$ L staining volume or 5 $\mu$ L per 100 $\mu$ L of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.	
Application Notes:	Additional reported applications (for the relevant formats) include: Western blotting <sup>1</sup> , immunofluorescence <sup>2</sup> , and immunoprecipitation <sup>1</sup> .

Description:	CD63 is a 53 kD type III lysosomal glycoprotein also known as LIMP, LAMP- 3, gp55, and melanoma-associated antigen (ME491). CD63 is a member of the tetraspan transmembrane superfamily (TM4SF) protein expressed on activated platelets, monocytes/macrophages, endothelium, fibroblasts, osteoclasts, and smooth muscle cells. CD63 may be involved in platelet activation and is thought to function as a transmembrane adaptor protein. CD63 has been shown to associate with CD9, CD81, VLA-3, and VLA-6.
