## Purified anti-human CD89

| Catalog \# Size: | $2370510 / 100 \mu \mathrm{~g}$ |
| ---: | :--- |
| Clone: | A59 |
| Isotype: | Mouse IgG1, k |
| Immunogen: | Ag8.653 myeloma cells |
| Reactivity: | Human |
| Preparation: | The antibody was purified by affinity <br> chromatography. |
| Formulation: | Phosphate-buffered solution, pH 7.2, <br> containing $0.09 \%$ sodium azide. |
| Workshop | V MR30 |
| Number: |  |$\quad$| Concentration: | 0.5 |
| ---: | :--- |

## Applications:

$$

Description: CD89, also known as $F c \alpha R$, is a 55-100 kD glycosylated protein. It belongs to the immunoglobulin gene family. It is expressed on granulocytes, monocytes, and macrophages but is absent on T cells. It can interact with IgA aggregates and plays an important role in IgA mediated immune responses.
